Month

KPI 1 – Insights & Recommendations

 INSIGHTS - Monthly Net Transaction Volume:

• Positive trend = healthy liquidity (more deposits than withdrawals)

• Declining months = potential churn or competitive pressure

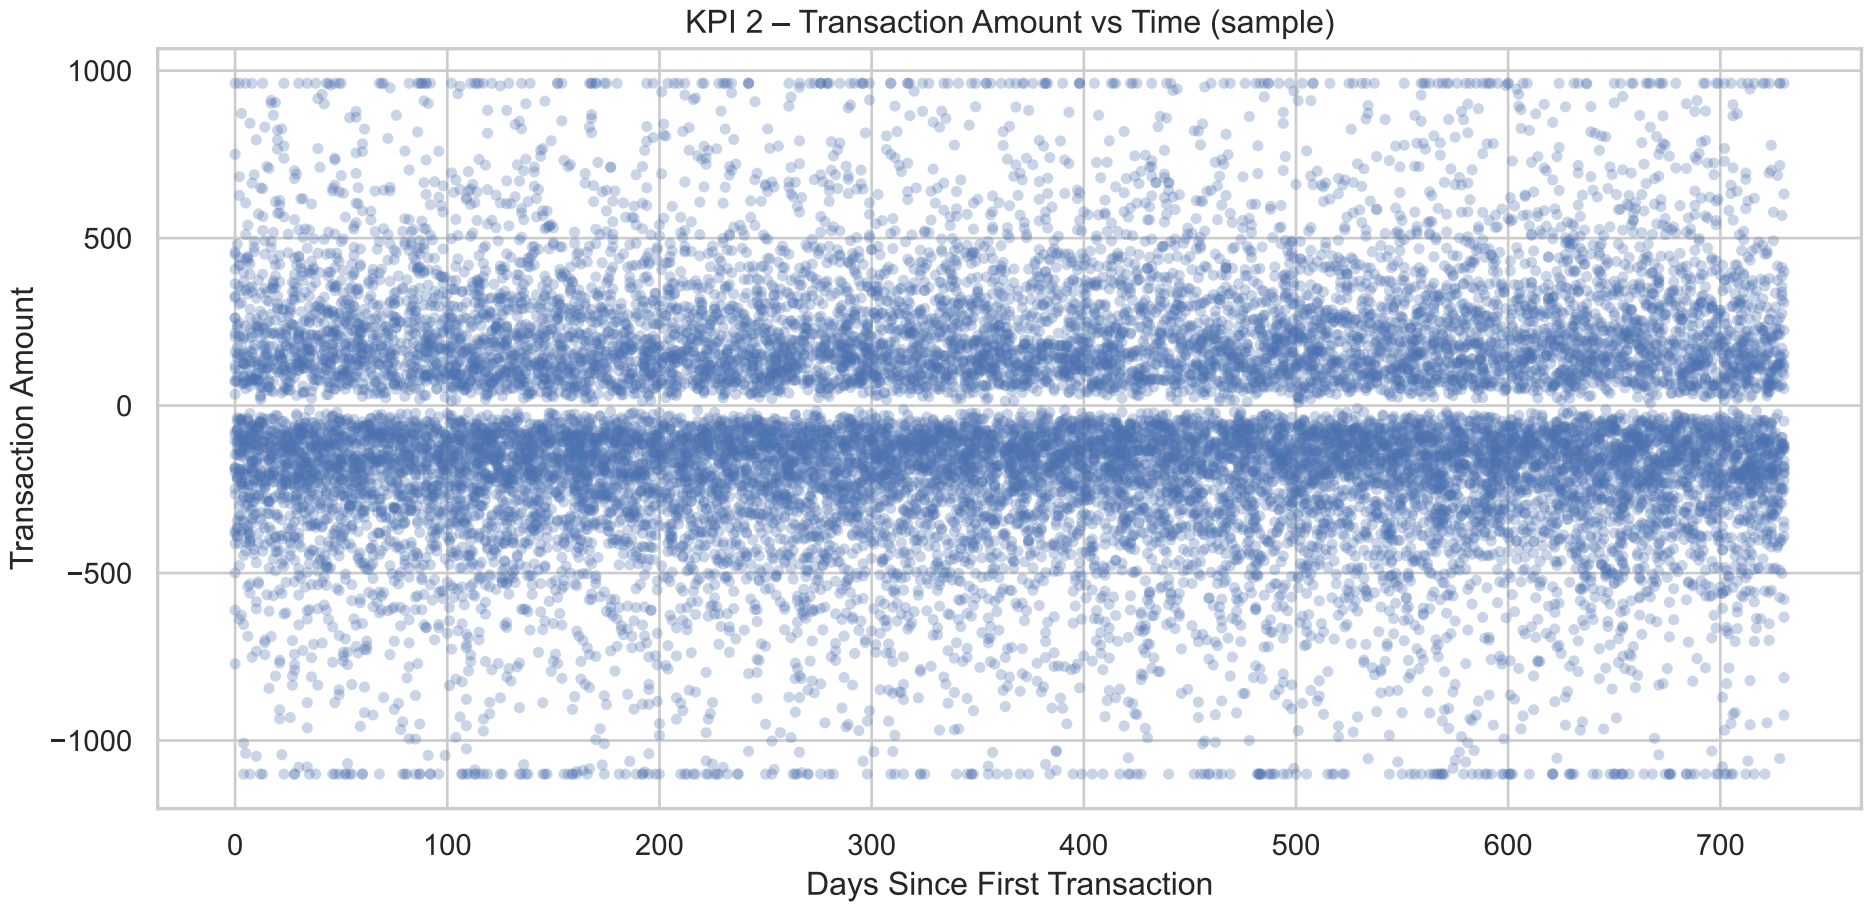
• Sharp spikes/drops = investigate campaigns, fees, or macro events

 RECOMMENDATIONS:

• Deploy excess liquidity into higher-yield products (loans, investments)

• Analyze negative-flow months to design retention campaigns

• Track monthly as early warning for liquidity and satisfaction



KPI 2 – Transaction Amount vs Time (sample)

Days Since First Transaction

KPI 2 – Insights & Recommendations

 INSIGHTS - Transaction Amount vs Time:

• Dense band near zero = most transactions are small everyday banking

• Outliers at extremes = high-value customers or business accounts (VIP)

• Stable pattern over time = consistent behavior, no structural breaks

 RECOMMENDATIONS:

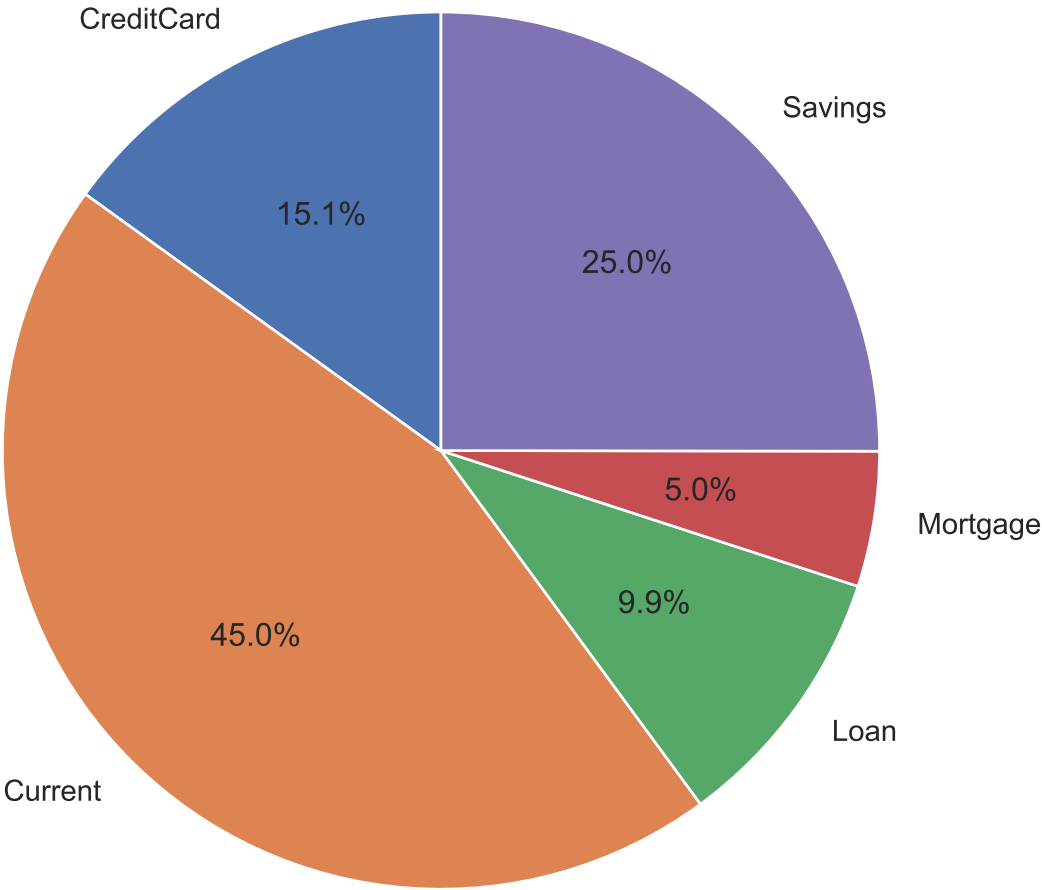
• Prioritize relationship managers for high-value outliers (VIP service)

• Segment customers by transaction size and tailor product offerings

• Use as input for fraud detection (unusual large transactions)

• Consider micro-loans for small spenders, wealth mgmt for high-value

KPI 3 – Product Mix by Transaction Volume (Pie)



KPI 3 – Insights & Recommendations

 INSIGHTS - Product Mix by Transaction Volume:

• Current (45%) + Savings (25%) = 70% of volume → deposit-heavy bank

• CreditCard (15%), Loan (10%), Mortgage (5%) = underpenetrated

• Low-margin transactional products dominate → cross-sell opportunity

 RECOMMENDATIONS:

• Target Current/Savings holders with pre-approved credit offers

• Bundle products (mortgage + savings + credit card discounts/rewards)

• Focus marketing on underrepresented high-margin products

• Track product mix shift over time as strategic success metric

• Drill down by region/channel to find best cross-sell opportunities
